PARACHUTES

Strain gage load measuring device - A
concept
MSC-13385 B70-10326 01

Jettisoning system for a parachute's
canister
NPO-11236 B70-10398 06

Amplifying ribbon extensometer
LANGLEY-11825 B75-10300 06

PARAFFINS

Resin additive improves performance of
high-temperature hydrocarbon lubricants
LEWIS-11364 B71-10394 04

PARALLAX

Technique for the integral casting of
pressure instrumentation in wind-tunnel
models
LANGLEY-10812 B71-10247 08

PARALLEL PLATES

Prediction of windage power loss in
alternators
LEWIS-10939 B71-10074 06

Parallel-plate viscometer
NPO-11387 B72-10700 03

PARALLEL PROCESSING (COMPUTERS)

Data processor with conditionally
supplied clock signals
GSFC-10975 B74-10021 02

PARAMAGNETISM

Energy levels and transition probability
matrix elements of ruby for maser
applications
NPO-11687 B71-10308 09

Low temperature scale for a 1 to 20
degree Kelvin region
AEC-10007 B72-10146 03

PARAMETERIZATION

Computer programs for the design of
liquid-to-liquid jet pumps
LEWIS-11679 B72-10584 09

FORTTRAN read package
MSC-14161 B72-10750 09

PARAMETRIC AMPLIFIERS

Discrete-component S-band power
amplifier
GSFC-11248 B71-10365 01

Varactor diode assembly with low
parasitic reactances
GSFC-11617 B75-10031 01

Integrated-circuit balanced parametric
amplifier

Originating Center/Tech Brief Number Index

The left hand column identifies the originating Center number; to the right of each originating Center number is the Tech Brief number, e.g., B75-10081, followed by a two-digit number, e.g., 03, which identifies the subject category containing the entire citation.

Tech Brief/Originating Center Number Index

The left hand column identifies the Tech Brief number, e.g., B75-10001, followed by a two-digit number, e.g., 03, which identifies the subject category containing the entire citation. Following the subject category number is the originating Center number.

Technology Utilization Publications

NASA Technology Utilization Publications are designed to aid the transfer of aerospace technology to industrial users in all fields. These publications include:

Tech Briefs:

A quarterly publication containing short descriptions of new products and processes and explaining their basic concepts and principles.

Technical Support Packages:

In-depth technical information designed to supplement most Tech Briefs.

Other TU Publications:

Handbooks, surveys, reports, conference proceedings, and special bibliographies.

Details on the availability of these publications may be obtained from:
